ZEYNEP AKKALYONCU YILMAZ

Master's student working on deep learning for NLP and IR at the University of Waterloo

EDUCATION

present – 2018

MMath in Computer Science
University of Waterloo — Waterloo, ON, Canada

GPA: 4.0 / 4.0

Courses: Software Engineering for Big Data, Theory of Deep Learning, Data Infrastructure, Data-Intensive Distributed Computing

2017 – 2013

BS in Computer Engineering
Middle East Technical University — Ankara, Turkey

GPA: 3.4 / 4.0

Relevant Courses: Introduction to Natural Language Processing, Cloud Computing, Linear Algebra, Data Management and File Structures

WORK EXPERIENCE

present – 2018

Research Assistant
Data Systems Group, University of Waterloo — Waterloo, ON, Canada

- Developing deep learning models to improve document retrieval methods with Prof. Jimmy Lin
- Previously worked on cross-lingual natural language generation for question answering

2017 – 2016

Research Intern
KOVAN Research Lab — Ankara, Turkey

- Built a deep reinforcement learning agent that manipulates stacked objects using TensorFlow
- Wrote Python scripts to generate random scenes to be used as training data in Blender
- Conducted literature review regarding robotic action planning based on verbal commands

2015

Software Engineering Intern
ASELSAN Inc. — Ankara, Turkey

- Developed software prototype to track and plot movement of a mobile device in real time
- Implemented a C++ library that extracts and displays motion information from built-in sensors
- Benchmarked different signal processing techniques in terms of speed and robustness

SELECTED PROJECTS

2019

Birch
https://github.com/castorini/birch

- Document retrieval system based on sentence modeling with BERT in Python
- Implemented training and retrieval modules that aggregate sentence-level evidence to rank documents
- Built an accompanying Docker image and Colab notebook for reproducibility
- Achieved state-of-the-art performance on standard TREC newswire and social media collections

2018

Sparksolrini
https://github.com/castorini/sparksolrini

- Apache Solr integration with Apache Spark for scalable text analytical applications
- Implemented an efficient distributed framework in Scala to bridge Solr output with Spark RDDs
- Demonstrated the effectiveness of predicate pushdown via Solr in terms of code expressivity and latency through multiple case studies including web graph analysis

2018

Tardis
https://github.com/achyudh/tardis

- Framework for distributed ensembles of seq2seq models with Keras and PySpark
- Implemented a pipeline to train and evaluate ensembles for machine translation using Elephas
- Achieved a ~10% increase in BLEU scores with ensembles on WMT'14 datasets over single learners

2017

Smart Shopping List
http://senior.ceng.metu.edu.tr/2017/thechaincoders

- Cross-platform mobile Xamarin shopping list application written in C#
- Built a RESTful API with Django around a SQLite database running on an Azure Linux VM
- Created a hybrid recommendation system in Python to make tailored product suggestions
- Implemented a virtual shopping assistant using NLTK featuring speech detection and generation

SKILLS

Python	PyTorch
C++	TensorFlow
Scala	Keras
Java	NumPy
C#	scikit-learn
SQL	Git
Spark	Unix
Hadoop	Bash
Docker	Azure

LANGUAGES

English Turkish
French Russian

ACTIVITIES

Turkish National Chess Team Player
TED Symphony Orchestra Violinist
Women in Math Grad Representative
Technovation Mentor
Teaching Assistant
- Computational Linear Algebra
- Principles of Data Management & Use
- Data Structures
